

**Green Ship Recycling**  
GREEN SOLUTIONS

## Green Ship Recycling

Wilhelmsen Ship Management (WSM) ensures your vessels are recycled in a truly green process. Our comprehensive solutions start from finding and supervising the yard, through the cleaning and demolition process and all the way to a well-documented and certified completion.

WSM uses a selection of stringently chosen yards to carry out recycling work in strict compliance with requirements.

### Service highlights:

- ⊕ Integrated solution from your vessel's last commercial port to the recycling yard
- ⊕ Complete supervision from pre-cleaning, dismantling, recycling and careful disposal of waste
- ⊕ Continuous progress report and certified documentation

All the recycling yards we work with are certified.

## Protect your reputation

All the recycling yards we work with combine a safe working environment with high environmental performance.

## What makes WSM different

- ⊗ Our processes are vetted by DNV-GL
- ⊗ Full documentation throughout our safe and environmental-friendly process ensure corporate social responsibility
- ⊗ Onsite specialist monitoring team to ensure compliance in health, safety and environment practices and guarantee against child labor
- ⊗ Our strong governance culture ensures a transparent and truly green recycling process
- ⊗ WSM supervision is independent of any bias or influence from any cash buyer or yard
- ⊗ We take control of the ship recycling process from the owner's perspective

## WSM is

- ⊗ A member of ISRA (International Ship Recyclers Association)
- ⊗ The founder member of IHMA (International Hazardous Materials Association)

Pre-cleaned bridge – Safe removal  
of all hazardous materials and wastes

Pre-cleaned accommodation  
area – Ready for demolition

## About Wilhelmsen Ship Management

WSM is a part of Wilhelmsen Maritime Services, a Wilh Wilhelmsen Group company. WSM provides technical and crew management services for various vessel segments; Ro-Ro and PCC / PCTC Vessels, Gas, Product / Chemical, Container, Cruise, Bulk, and Offshore. Other key services include dry docking services, new building supervision, Inventory of Hazardous Materials (IHM) and lay-up management.

Hazardous materials transported  
to approved disposal facility
