

PROTECT YOUR GAS CYLINDERS & EQUIPMENT

Stop flashback's endangering personnel and damaging equipment and cylinders

AUTOMATIC FLASHBACK ARRESTORS
for gas outlet points

- prevent backfeeding
- cut off gas supply with each flashback
- cut off gas supply with excessive temperature in the arrestor

Manufactured according to EN 730-1, ISO 5175
BAM Certification - No: BAM/ZBF/009/12

SAFETY ELEMENTS

- 1. FLAME ARRESTOR**
High quality stainless steel sintered element. A returning flashback is stopped and quenched here.
- 2. NON-RETURN VALVE**
Spring loaded non-return valve against slow and sudden reverse flow.
- 3. PRESSURE SENSITIVE CUT-OFF VALVE**
Closing automatically with increasing reverse pressure caused by reversed flow or flashback.
- 4. TEMPERATURE SENSITIVE CUT-OFF VALVE**
Automatically closing at predetermined internal temperature.
- 5. EXPLOSION PRESSURE RELIEF VALVE**
Spring loaded valve venting flashback shock waves and soot.
