CLEANING CHEMICALS  
GALLEY AND ACCOMMODATION

## THE NEW UNITOR GALLEY AND ACCOMMODATION CLEANING OFFER

### A complete on board cleaning solution

With living and working areas so close together, keeping galley and accommodation areas clean can be a challenge. While cleaning operations have to comply with required rules and regulations, cleaning on board is not the responsibility of specialist cleaners. Crews are in constant rotation and bring different experiences of cleaning products and practices. Misunderstandings could potentially lead to non-compliance, or worse, harm to the crew.

Buying and using products and equipment from the same supplier globally makes everything easily recognisable and manageable – sourcing, use, instruction and application. In direct response to the challenges faced by the industry, Wilhelmsen

Ships Service (WSS) has designed and developed a high quality, standardised range of galley and accommodation cleaning products. The standardised range provides easy and effective cleaning for all major galley and accommodation areas through the combination of the newly developed **Unitor EasyClean** products and the **Unitor Gamazyme** range. This includes solutions for surface cleaning and disinfection, system treatment, as well as skin cleaning and protection, all supported by effective dispensing equipment, associated products and necessary documentation. Effective and easy to use. In a changing environment, we keep cleaning simple.
