HPCE 330/SANDBLASTING EXTREME PACK

Product group: **436** Product number: **721167**

Sandblasting pack, Unitor™ HPCE 330™

Allows fast surface preparation of up to 40m²/h to SA 2,5 depending on high pressure cleaner used.

Kit includes container for grit (Garnet grit is recommended)

Product information

In several countries sandblasting is banned. Water blasting combines with abrasive like Garnet is a safer and dust free method. Process speeds can be as fast as conventional dry sand blasting when using the equivalent size and type of media. However the presence of water between the media and the substrate being processed creates a lubricating cushion that can protect both the media and the surface from excess damage. This has the dual advantage of lowering media breakdown rates and preventing impregnation of foreign materials into the surface. Hence surfaces after wet blasting are extremely clean, there is no embedded secondary contamination from the media or from previous blasting processes, and there is no static cling of dust to the blasted surface. Subsequent coating or bonding operations are always better after wet blasting than dry blasting because of the cleanliness levels achieved.

Features

- Included helmet with ear and facial protection
- Suction hose
- Container

Benefits

- Dust free surface blasting
- Leaves no static cling of dust on surface
- Best treatment prior to painting

Specification

General

Invent Hazard Material (IMO/EU) classification	NA
