Product group: **715**    Product number: **905673**

Unimix 10 is an Argon-CO2 gas mix with 10% CO2 in Argon used as a shielding gas in wire welding processes (MIG / MAG). This product is delivered in a Unitor cylinder as part of WSS global cylinder exchange program.

## Product information

An Argon-CO2 mixture of 10% Carbon Dioxide, 90% Argon. This product is delivered in a 10 litre cylinder. Argon-CO2 mixtures are normally used as a shielding gas in arc welding processes.

### Features

- Argon-CO2 mix is a colourless and odourless gas
- Argon-CO2 mix is slightly heavier than air and is an inert gas
- Argon-CO2 mix is non-combustible
- It's used as a shielding gas for wire welding, primarily to protect the molten pool against contaminants in the atmosphere
- 90% Argon/10% CO2 mix is suitable for welding all un/low alloyed carbon steels and stainless steel in certain applications
- Unimix gives a very stable molten pool together with optimum energy transmission and spray transfer mode

### Benefits

- Suitable for MAG welding applications where an active shielding gas is required typically for low-alloy steels.
- For your safety, the product is delivered in a Unitor exchange cylinder complete with barcode and unique cylinder serial number.
- We trace and track all cylinders using our system to give you peace of mind.
