# GAMAZYME DIGESTOR 25 LTR

Product group: **656**    Product number: **628026**

Unitor™ Gamazyme™ Digestor is a patented formulation containing a synergetic blend of highly specialised bacteria. The mix of micro-organisms in this product increases organic degradation performance.

## Product information

This product supersedes product no: **624015**

Utilising active enzymes to eat through biological and organic waste products, Unitor™ Gamazyme™ Digestor is a safe and non-corrosive product used to restore flow in drains where grease accumulation is a problem. Unitor™ Gamazyme™ Digestor's biochemical formulation is designed to provide exceptional performance in clogged drain lines, grease traps and floor drains. It restores slow running drains and reduces odours due to organic build-up.

### Features

- Water based biological drain cleaner for slow running drains
- Patented, environmentally friendly bioenzymatic formulation designed to restore flow in drain systems containing greasy deposits
- Results in increased bacterial activity in a variety of organic wastes
- Environmentally adapted

### Benefits

- Free of harsh chemical compounds normally associated with acid and caustic drain openers
- Provides penetration, breakdown and degradation of organic drain line deposits and blockages
- Ideal for applications subject to aerobic and anaerobic environments

## Specification

### General

<b>Invent Hazard Material (IMO/EU) classification</b>	C-49
---	------

### Physical properties

<b>Appearance</b>	Green
<b>Density [g/ml]</b>	1,0
<b>Form</b>	Liquid
<b>Smell</b>	Herbal/Lemon

### Technical data

<b>Temperature [°C]</b>	10 - 60 active range
-------------------------	----------------------

## Documents

[SDoC and MD for IHM](#)

## Directions for use

### 1. Drain Cleaner

Use 500ml of Unitor™ Gamazyme™ Digestor per 5cm drain diameter to restore flow in drains and to keep them free flowing. Repeat the operation if necessary. Use regularly, once a day or several times a week to maintain drains free of grease.

### 2. Cleaning of Pulpers

Flush the whole system at the end of the day including pulpers, pipes, etc. with warm water (maximum 60°C) and Unitor™ Gamazyme™ Digestor.

Dose the product neat in the economiser tank by using a dosing pump. Use a dosage rate of approximately 2 litre per m3 water.
