PRESSURE CONTROL - KP1

Product group: **604** Product number: **547406**

The low-pressure switch is a safety device used in the refrigeration system. The low-pressure switch responds directly to system pressure changes on the low side and can provide single-device control of the compressor.

Product information

Features

- Starts or stops compressors according to set point
- 1/4" flare connection
- Vibration and shock resistant

Benefits

- High reliability both electrically and mechanically.
- High quality

Specification

General

Invent Hazard Material (IMO/EU) classification	NA
Product code	060-1101

Dimensions/Weight

Connection [Size/ Type]	1/4 FLARE
-------------------------	-----------

Technical data

Function	AUTO
----------	------

Performance data

Range	-0.2 TO +7.5 BAR
-------	------------------

Documents

[SDoC and MD for IHM](#)
