

Product group: 191 Product number: 500500

UWI-500TP is a powerful welding inverter for all arc welding (Stick/TIG/MIG/MAG) & gouging processes onboard. Ideal for vessels requiring high duty cycle welding using very long welding cables extension especially deck maintenance etc.

Product information

This product supersedes product no: 670398

EJ Ecodesign Compliant Welding Machine

The welding machine is supplied "without" any accessories. To order, include Part No. 670406 ACCESSORIES KIT F/UWI-230,-320,-500.

Features

- Stick electrode (MMA) with adjustable hot start and arc force for optimal welding properties
- Lift-Arc TIG welding with remote control option for all welding processes, with total arc control both during welding and for the down-slope finish of the weld. Adjustable gas post-flow prevents faults in the end phase of the weld
- Two machines can be linked in parallel for up to 1000 Amperes for Air Carbon Arc gouging
- Voltage Reduction Device (VRD) function reduces open circuit voltage to only 9VDC which reduces risks of electric shock and electrocution to the lowest level
- Built-in Total Protection (TP), Line-voltage compensation and Thermal overload protection
- Made of high-grade aluminium casing that reduces weight and corrosion risks

Benefits

- Safe and compliant welding machine for maritime use
- Heavy duty and superior reliability in tough maritime environment
- 5-500A current range covers the use of any size of welding electrodes and two machines can be connctced parallel to provide 1000A
- Multi-process welding with combination of UWF-102 Wire Feeder for wire welding
- Spare part kit available easy repair and to minimise downtime

Specification

General

Invent Hazard Material (IMO/EU) classification	D-1
--	-----

Dimensions/Weight

Dimensions L x W x H [mm]	670 x 290 x 510
Weight [kg]	47

Technical data

Duty cycle [%]	
Ingress protection	IP23S
Recommended fuse [A]	
Voltage [V]	3 phase 380-440V 50/60Hz main supply
Welding current [A]	5-500
