TANKLEEN TAR 210 LTR

Product group: **652** Product number: **764430**

Unitor[™] Tankleen Tar[™] is a concentrated, heavy-duty solvent based cleaner and degreaser. It is particularly effective as a spot cleaner on stubborn deposits as dried tars and bitumen on tank walls.

Product information

Features

- Highly concentrated tank cleaner with quick penetration and powerful emulsifying properties, can also be used for the removal of tars, bitumen and similar difficult tank contamination's.
- The emulsifying agents in this product are biological degradable.
- Easy rinse off, leaving clean and oil-free surfaces and safe to use on most metal surfaces, painted surfaces and tank coatings.

Benefits

- Saves time through quick action.
- Reduces the number of products needed as the product work both as spot and re-circulation cleaner

Specification

General

Invent Hazard Material (IMO/IU) classification	C-49
--	------

Physical properties

Appearance	Clear pale yellow
Density [g/ml]	1,18
Flash Point [°C]	Above 85
Form	Liquid

Documents

[SDoC and MD for IHM](#)

Directions for use

Spot cleaning

Unitor[™] Tankleen Tar[™] can be sprayed neat onto tank surfaces to be cleaned. The contact time should be at least 20 minutes to solubilise hard films before rinsing with fresh water. Bulkheads/walls can be washed down by use of tank washing machines or high pressure cleaning machines. Slops should be constantly stripped from the tank and transferred to a holding tank or pumped ashore to slop tanks.

Re-circulation method - for tank cleaning machines

It is advised to use a solution of 10% i.e. 100 litres per ton of hot wash water mixed in the tank to be cleaned. The washing solution is usually 5 - 10% of the tank capacity. Recirculate using a tank washing machine for 4 - 8 hours at 50 - 60 dg. C.

Dose rates and results will vary depending on contamination, the temperature of cleaning solution, and number of tanks to be cleaned with the solution.
