# INSOLUBLES TEST KIT

Product group: **663** Product number: **625749**

Insolubles contamination usually comes from combustion and mainly in the form of unburned hydrocarbon. High insolubles loading will cause laquering and other undesirable effects like stiction and increased wear.

## Product information

The test is used to detect Insolubles from diesel engine combustion products (such as fuel ash, carbon, partially oxideized fuel, oil oxidation products) and spent lubricant additive.

Test Parameter: Insolubles

Supplied with: 1 pc bottle 100 ml 1 pc bottle cap 1 pc plastic stirring rod 1 pc drop bottle label 100 pcs chromatography papers 1 pc large module box 1 pc test kit manual

### Features

Simple, fast and accurate

### Benefits

Instant indication of conditions for components allowing informed on-site maintenance decisions

## Specification

### General

Invent Hazard Material (IMO/EU) classification	NA
--	----

## Documents

[SDoC and MD for IHM](#)
