TURBIDITY TUBE

Product group: **661** Product number: **778415**

The turbidity test is designed to give a measurement of the suspended solids content of the final effluent. It is also useful in following the day to day variation in the quality of sewage and effluent.

The turbidity test uses a specially calibrated plastic tube. This provides the simplest possible method of performing this important test.

Product information

Turbidity tube consists of 2 pieces fit together to make one tube. Quick and easy test for turbidity. Simply fill with water until you cannot see the X at the bottom of the tube and read off turbidity in NTU. Test Parameter: Turbidity

Supplied with: Turbidity tube graduated 30 to 500 Turbidity Units With an additional section: Turbidity tube graduated 5 to 25 Turbidity Units

Features

- Turbidity in NTU is a useful operational test of water clarity and can be used as an early warning test for contamination.
- Quick and easy test

Benefits

- Portable, easy to use kit for testing water samples

Specification
