# HR TOTAL HARDNESS TEST KIT

Product group: **661** Product number: **755775**

Consumables: Water hardness is caused by the presence of calcium and magnesium salts. High levels of hardness prevent the formation of lather with soap, and can cause scaling in water systems, particularly steam boilers, engine cooling systems and fresh water pipework. Hardness is an important control test in a wide variety of applications

## Product information

Tablet Chemistry  
Foil-wrapped packaging for storage

### Benefits

- Easy operation and exact reagent dosing
- High accuracy
- Foil-wrapped tablet reagents with a minimum guaranteed shelf-life of 5 years

## Specification

### General

Invent Hazard Material (IMO/EU) classification	C-9
------------------------------------------------	-----

## Documents

[SDoC and MD for IHM](#)
